

## TECHNICAL DATA SHEET

### JAKOZY

**Commercial name:** JAKOZY

**Common name:** Bio stimulant included Potassium

**Description:** bio stimulant based on free amino acids from plant source.

**Composition:**

PARAMETER	SPECIFICATION
Appearance	Liquid
Color	Light green
Density	1.2 g/cc
PH	6 – 6.5
Amino acids plant source w/v	5%
Water soluble K <sub>2</sub> O	5%
Water and Inert ingredients	90%
Packaging	1 lt, 5 lt, 20 l, 50 lt, 100 lt, 500 lt & IBC 1000 lt

**Product functions:**

- Improve soil structure.
- Improve nutrients uptake by root system.
- Improve root development and seed germination.
- Reinforce photosynthesis and respiration.
- Increase yield and improve quality

Physical and Chemical characteristics:

Appearance	Liquid
Color	Light green
Density	1.2 g/cc
PH	6 - 6.5

#### Action Spectrum:

Intensive crops, in particular: vegetables, fruit trees, vines and olive trees, citrus, banana, strawberry, ornamental, turf and pasture.

#### Dosage:

Applied by ground spray applications, drip irrigation, overhead irrigation systems or fertigation systems. For best results JAKOZY should be applied once transplanting with rate 5-8 liters/hectare and reapplied the second application after 15 days from the first. If conditions warrant, JAKOZY can be reapplied on an as-needed basis.

#### Conditions of use:

Can be applied with NPK starter fertilizer early in the growing season or just prior to planting. JAKOZY may also be applied with Nitrogen products to promote top growth if be desired. Do not apply JAKOZY when the soil has become saturated with water. For best results do not tank mix with soil wetter/ surfactant chemistries, this can cause the active ingredient to be pushed below the root the zone.

#### Packing:

1 Lt , 5 Lt , 10 Lt, 20 Lt, 50 Lt, 200 Lt, 500 Lt & 1000 Lt.

#### Storage:

It will store indefinitely under normal conditions. It is recommended that the product is stored in a dry, clean, well ventilated, moisture proof place.

#### Compatibility:

It is compatible with most pesticides and foliar fertilizers, except for oils, low pH (acids) and calcium nitrate.

It is recommended that a small test before mixing.

#### Precautions

##### (S-phrases):

S2 Keep out of reach of children.

S20/21 Do not eat, drink or smoke during use.
